

This document provides compliance guidance to producers who are required to establish and operate tire collection systems under the Tires Regulation - O. Reg. 225/18.

The Tires Regulation requires producers to submit to the Registry the identity of each tire collector and tire collection site that is a part of that producer's tire collection system, on or before November 15, 2018. It is up to each producer, or a Producer Responsibility Organization (PRO) on the producer's behalf, to identify the tire collection sites that will be used in their tire collection systems.

## **Tire collection system reporting process**

Tire collectors are required to register and identify their collection sites (i.e., the address for every individual site where tires are collected) by October 31, 2018. The collection site data will be used to populate a list of collection sites that will be available to producers and PROs beginning November 1, 2018. Producers, or their PROs, will be required to identify their tire collection systems by selecting collection sites from the list on or before November 15, 2018.

While s. 5(1) of the Tires Regulation requires each producer to "establish and operate a collection system for tires in accordance with the applicable requirements, 5(2) also provides that:

For greater certainty, a tire collection site **may be operated by or on behalf of one or more producers and may be relied on by one or more producers** to satisfy the requirements set out in sections 6 to 10. [emphasis added]

For the purposes of establishing a collection system, it is not necessary for a producer to have an agreement with every collector whose sites are included in the collection system. The collection system requirement is intended to ensure that consumers throughout Ontario have access to collection sites for their used tires. This requirement is separate from a producer's requirement to collect and manage used tires, either directly or through a PRO.

However, every producer, directly or through a PRO, is required to ensure that the collection system meets the requirements of the Tires Regulation. This includes meeting the applicable requirements in Schedule A of this Bulletin as well as ensuring that, with respect to each tire collection site that is part of the producer's tire collection system, the following requirements from s. 10 of the Tires Regulation (among other requirements) are satisfied:

1. The tire collection site must be operated and accept tires during normal business hours.
2. The tire collection site must accept tires that are still attached to rims.
3. The tire collection site, other than a tire collection site owned or operated by a municipality or the Crown in right of Ontario, at which new tires are supplied or provided on a new vehicle must accept, at a minimum,
  - I. tires that are of a similar rim size and calculated weight as those supplied or provided at the site, and
  - II. up to 10 tires per day from any person that are of a similar rim size and calculated weight as those supplied or provided at the site.

## **Tire Collection Systems – Large Producers**

Under the Tires Regulation, a large producer is any producer, other than a producer who only supplies large tires or vehicles on which large tires are provided, who is required to collect 10,000 kilograms or more of tires (calculated weight) in a calendar year. The Tires Regulation identifies two options for large producer collection systems:

- A retail location-based option under s.6(1)(a), or
- A population-based approach in s. 6(1)(b).

**Schedule A** of this bulletin uses Statistics Canada's most recent census data (2016) to set out the minimum number of collection sites required in each local (single and lower tier) municipality and each territorial district to meet the requirements of section 6(1)(b) of the Tires Regulation. Producers (or their PROs) may rely on the information in this schedule to meet the requirements under s. 6(1)(b) of the Tires Regulation.

Schedule A can also be used for determining the number of collection sites required under section 6(1)(a) of the Tires Regulation for each local municipality and each territorial district that do not have retail locations that supply a producer's tires or vehicles with tires.

## **Tire Collection Systems – Small Producers**

Under s. 7 of the Tires Regulation, a small producer is any producer, other than a producer who only supplies large tires or vehicles on which large tires are provided, who is required to collect less than 10,000 kilograms of tires (calculated weight) in a calendar year.

A small producer must establish and operate at least one tire collection site in each local municipality that has at least one retail location that supplies the producer's tires or vehicles with tires. In territorial districts, a small producer must establish and operate at least one tire collection site within 30 km of any retail location that supplies the producer's tires or vehicles with tires. Schedule A to this bulletin identifies the territorial districts.

## **Tire Collection Systems – Producers of Large Tires**

Large tires are currently defined to be tires that are 700 kg or more, in accordance with the Registry Procedure – Weight Conversion Factors (Tires), which is incorporated by reference into the Tires Regulation.

Every producer who supplies large tires or a vehicle on which large tires are provided to consumers in Ontario shall provide for the collection of large tires in a manner that is, at a minimum, equivalent to the way the tires were supplied. See s. 9 of the Tires Regulation.

## **Tire Collection Systems – Producers Without Retail Locations**

Every producer, other than a producer who only supplies large tires or vehicles on which large tires are provided, whose sole means of supplying tires or vehicles on which tires are provided to consumers in Ontario is through the Internet, using a catalogue or telephone order system or by any

other remote sales method, shall provide for the collection of tires in a manner that is, at a minimum, equivalent to the way the tires were supplied.

Alternatively, such a producer can establish a population-based collection system in the same way as large producers and can use the information in Schedule A to do so.

## Schedule A

	2016 Census	s. 6(1)(b)	s. 6(1)(a)(ii) and (iv) - if no retail locations
