

Tire Performance Reporting

A guide for service providers to
complete their annual performance
reporting to RPRA

Table of Contents

1. [Introduction](#)

What is tire performance reporting, who completes the report, where do I access the report, how do I log into the Registry, when is the report due?

2. [Hauler Performance Reporting](#)

What data do I need to report, how do I access the report? Step-by-step instruction to complete the report.

3. [Processor Performance Reporting](#)

What data do I need to report, how do I access the report? Step-by-step instruction to complete the report.

4. [Retreader Performance Reporting](#)

What data do I need to report, how do I access the report? Step-by-step instruction to complete the report.

1. Introduction

RPRA Resource Productivity
& Recovery Authority

What is Tire Performance Reporting?

Tire performance is an annual report that service providers with obligations under the Tire Regulation complete to provide information about their tire recovery and management activities in the previous calendar year. For example, in 2025 service providers are required to report on their performance activities for 2024, and so forth.

This document will assist haulers, processors and retreaders with understanding what data they need to report and provide step-by-step instructions on how to complete the report in the Registry.

Further information about the Tires Regulation can be found on the [RPRA webpage](#).

If you have further questions that are not answered in this guide, please contact the Compliance Team at registry@rpra.ca or call 647-496-0530 or toll-free at 1-833-600-0530.

Who completes Tire Performance Reporting?

1. Haulers

You are a [tire hauler](#) if you arrange for the transport of tires in Ontario to a site for processing, reuse, retreading or disposal.

2. Processors

You are a [tire processor](#) if you receive and process tires for resource recovery or disposal.

3. Retreaders

You are a [tire retreader](#) if you replace the tread on worn tires so that they can continue to be used as tires.

Note: Tire collectors only have an obligation to maintain records, which must be available for inspection as required.

Where do I complete my Tire Performance Reporting?

The tire performance report is completed online through RPRA's Registry. You can access your Registry account here: [Registry Log-in](#)

Some tips for logging into your Registry account:

- If you have forgotten your password, click "Forgot Password" on the login screen and follow the instructions provided.
- The Registry will not work with the Internet Explorer web browser. Google Chrome is the recommended web browser to use

What if I have multiple roles?

Many businesses operate as more than one role related to tire resource recovery. For example, a tire processor may also haul tires to their facility.

You must complete all the reporting requirements for every role.

If you have multiple roles incorporated as one business: You should have created one Registry account where you can manage all your roles and access all required reports.

If you have multiple roles incorporated as separate businesses: You must create a separate Registry account for each incorporated business and report performance separately.

Performance report

Accessing your program

1. After logging in, click on the icon for the **Tires** program on your dashboard.

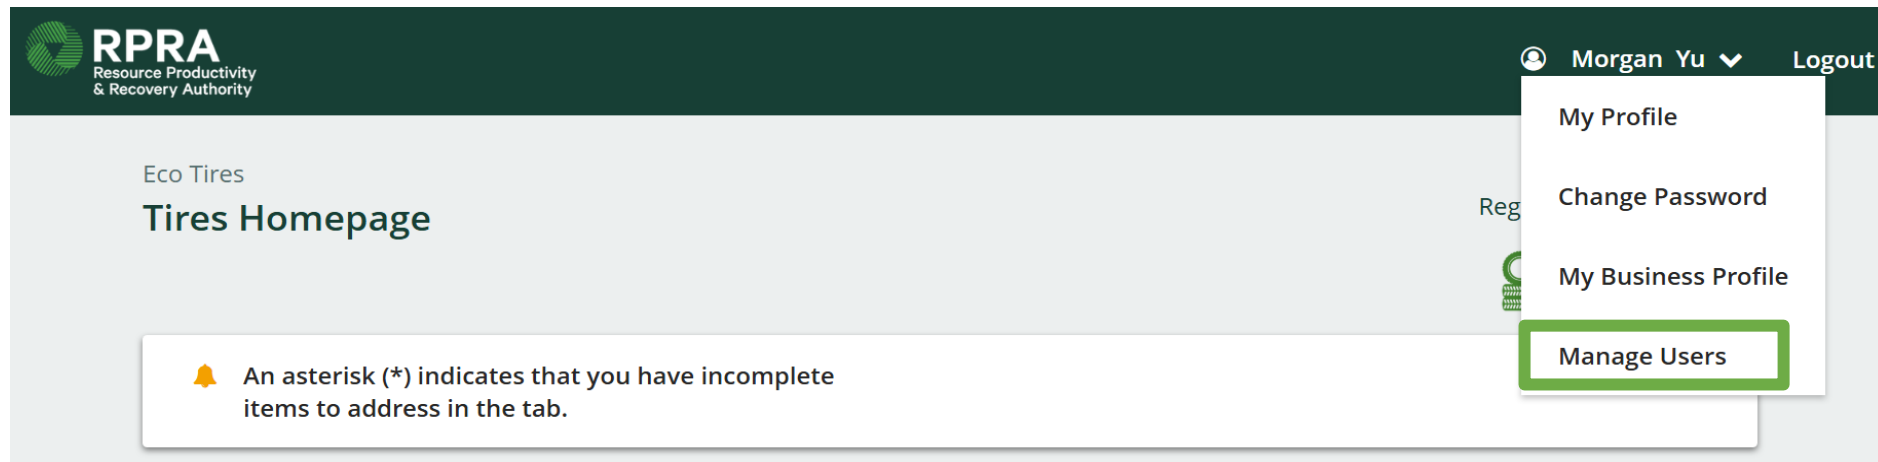

How to manage contacts on your Registry account

Account Admins must add any new, or manage existing, contacts under the program they wish to give them access to (e.g., permissions to view and complete Reports).

To Manage contacts on your Registry account, please see the following steps:

1. Once you are logged into your account, click on the drop-down arrow in the top right corner and select **Manage Users** as shown below.

How to manage contacts on your Registry account cont.

- 1. Under Actions, click **Edit** to update preferences of existing users.
- 2. Click **Add New User** to add an additional user to your account.

A Primary User of a given program has the same abilities as a Secondary User plus the ability to manage users within that program.

What if I have multiple roles?

Once you log into your Registry Account, each of your roles will be displayed as different tabs on your Registry Dashboard.

Click on the name of the role to access reports and other information for that category.

The screenshot shows the 'Eco Tires Tires Homepage'. At the top right, it displays 'Registration #:00034889' and a 'Tires Switch Programs' button. A notification box states: 'An asterisk (*) indicates that you have incomplete items to address in the tab.' Below this is a navigation bar with tabs: 'Producer *', 'Hauler *', 'Retreader *', 'Processor *', 'PRO Status', 'Collection Activities', 'Invoices', and 'Add Roles'. The 'Hauler *' tab is selected. Underneath, a table titled 'Tires' has columns: 'Report', 'Status', 'Last Updated By', and 'Action'. The table contains one row: '2024 Tire Performance - Hauler' with a status of 'Not Started' (Due Date: May 31, 2025) and an action button 'Start'. At the bottom, there are links for 'Need help? Explore our Registry Resources' and 'Can't find an answer? Contact Us'.

Report	Status	Last Updated By	Action
2024 Tire Performance - Hauler	Not Started Due Date: May 31, 2025		Start

2. Hauler Performance Reporting

RPRA Resource Productivity
& Recovery Authority

What data do haulers need to report?

A. Used tires picked up

1. Number and calculated weight of total tires picked up
2. Number and calculated weight of tires picked up from outside Ontario

B. Used tires dropped off

1. Calculated weight of tires delivered to a processor
2. Number and calculated weight of tires delivered to a retreader

C. Used tires sent for reuse

1. Number and calculated weight of tires sent to be reused on a vehicle
2. Number and calculated weight of tires sent for reuse for a new purpose

Examples include: dock bumpers, agricultural bunks; flower pots and planters

RPRA has developed a [Weight Conversion Factors Procedure](#) to determine the calculated weight of tires. Common calculated used tire weights include:

- Passenger and light truck tire = 12.5 kg
- Medium truck tire = 50 kg

Locate the Report on your Registry Dashboard

Once you log into the Registry you will see the Registry Dashboard.

This is the unique identifier that has been assigned to you. You can reference this number if you need to contact the Compliance Team.

A. Used Tires Picked Up

In this section, you will report the number of tires picked up from both inside and outside of Ontario.

You will need to enter data in the two tabs indicated:

- 1 Total Picked up
- 2 Outside Ontario

Throughout the report, you will enter data for two categories:

- 1. Tires ≤ 700 kg
- 2. Tires > 700 kg

C. List of products you or a third party made from your processed materials

On the second tab, you will report all categories of products that were made by a third party using your processed materials. Check all categories that apply.

Click **Other** if the product does not fall into another category. You will need to provide a description of the product in the comment box provided.

If no products were made by a third party, click on this box.

Click **Save** and **Continue** to return to the report summary screen and complete the next section of the report.

Third-party Products

Select all categories of products that third parties make with your materials.

Third-party Products

☐ Mulch, all applications, excluding landfill drainage chips

☐ Landscaping products (not mulch), including tree rings and pavers

☐ Sporting and playground surfaces (not mulch)

☐ Sporting and playground equipment

☐ Flooring products, including agricultural applications

☐ Sound proofing products

☐ Roofing applications

☐ Blasting mats

☐ Ballistic products

☐ Bases, e.g., pylon and post bases

☐ Blocks, including wheel chocks

☐ Equipment feet, e.g., ladder and furniture feet

☐ Vehicle splash guards, mud flaps and floor mats

☐ Ramps

☐ Rubberized asphalt

☐ Speed bumps and parking curbs

☐ Cable guards

☐ Footwear

☐ Houseware products, including planters, coasters and furniture

☐ Other

☐ No product was made by any third party

D. Number and calculated weight of tires sent to be reused on a vehicle or for a new purpose

In this section you will be reporting the number of tires used and collected in Ontario that were sent for reuse **with or without modification** for continued use on a vehicle and **without modification** for a new purpose.

You will need to enter data in the two tabs indicated:

1 Total reused on vehicles

2 Total reused for a new purpose

RPRA has developed a [Weight Conversion Factors Procedure](#) to determine the calculated weight of tires.

Common calculated used tire weights include:

- Passenger and light truck tire = 12.5 kg
- Medium truck tire = 50 kg

1

2

Total reused on vehicles

Total reused for a new purpose

Tires used and collected in Ontario, sent for reuse with or without modification for continued use on a vehicle.

Total reused on vehicles	Units	Total Kilograms
Tires less than or equal to 700 kg		
Large tires greater than 700 kg		
Total		

Start

4. Retreader Performance Reporting

RPRA Resource Productivity
& Recovery Authority

What data do retreaders need to report?

- A. Actual weight of tires received from haulers
- B. Number and calculated weight of tires retreaded or sent to a processor
- C. Actual weight of shavings, strips, buffings and trimmings sent to a processor or for disposal
- D. Number and calculated weight of tires sent to be reused on a vehicle or for a new purpose
- E. Number and actual weight of tires disposed (such as land disposal, incineration, used as fuel or fuel supplement or stockpiled)

RPRA has developed a [Weight Conversion Factors Procedure](#) to determine the calculated weight of tires. Common calculated used tire weights include:

- Passenger and light truck tire = 12.5 kg
- Medium truck tire = 50 kg

Locate the Report on your Registry Dashboard

Once you log into the Registry you will see the Registry Dashboard.

This is the unique identifier that has been assigned to you. You can reference this number if you need to contact the Compliance Team.

Notices about your account are shown here.

Confirm you have selected the Retreader role.

On the second tab you will enter the total number and calculated weight of tires you sent to be reused **for a new purpose**.

Examples include:

- Dock Bumpers
- Flower Pots/Planters
- Agricultural Bunkers

Do not include tires that you retreaded or modified before sending for reuse.

If you did not send any tires for reuse for a new purpose, click here.

Click here to enter total number and total calculated weight (in kg) of tires.

Once you are done inputting data, click **Save** and **Continue** to return to the report summary screen and complete the next section of the report.

E. Number and actual weight of tires disposed

In this section you will report the total weight in kg of **tires** sent to landfill and dumps, incinerated, used as fuel or stockpiled.

You will need to enter data in the four tabs indicated:

1 Land Disposed

2 Incinerated

3 Used as

4 Fuel

Stockpiled

Do not include the weight of shavings, strips, buffings and trimmings that you sent for disposal in this section of the report.
